

STEP BY STEP GUIDE TO REMOTE LOGON ACCESS (For HD and Analogue CCTV Systems with a Cobra or Alpha DVR)

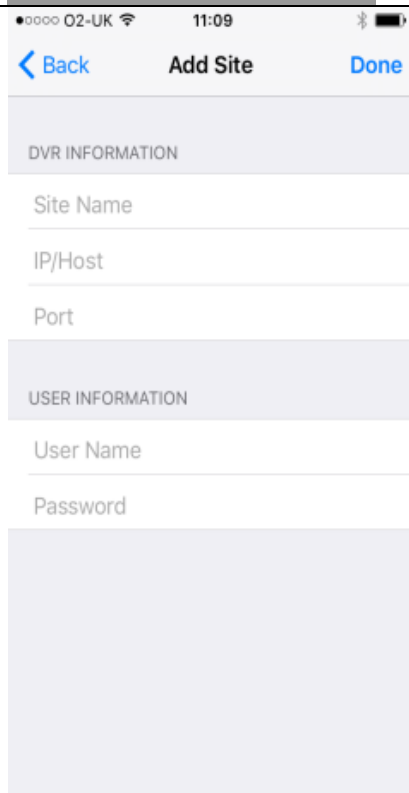

Step 1: Download the Smart Eyes App to your device from the App Store – Apple and Android apps available.

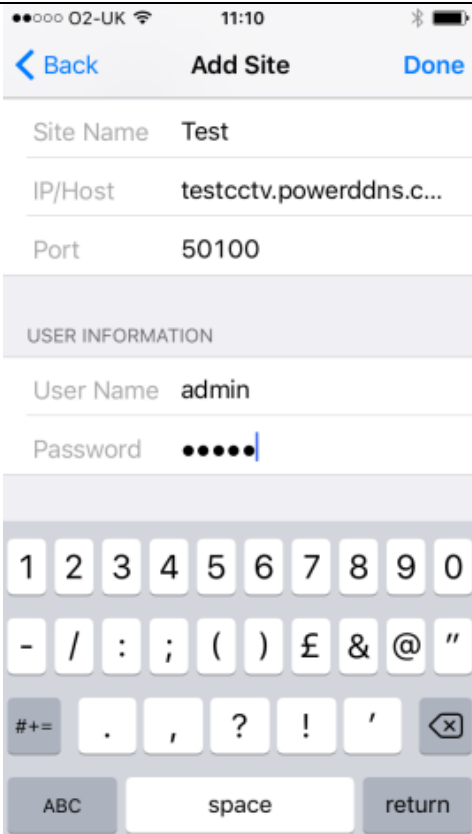

Step 2: Open the Smart Eyes app on your device once downloaded and open the Site List.

Step 3: Click/tap on 'Manual Input' under Add Site.

Step 4: Input the details given to you (see email or information from when CCTV system was installed) against the appropriate categories under Add Site.

Step 5: The information you input should look like this test example. Input the password you have been given during setup, you will have the option to change your password later once you have completed the Remote Access process. Click/tap on Done once finished.

Now you have your info in the Site List in the app, just tap on the name you want to view and the site opens.

Step 6: Close and reopen the app, the site you have just input will appear and you can click/tap on it to view. To switch between different camera views, click/tap at the bottom of your screen and use the arrows that appear.

If you have any difficulties setting up Remote User Access, please contact:
